Services

G Cubed Metals Ltd's mission is to help organisations navigate their way through the sometimes arcane world of precious metals: be they experienced in the market or a newcomer seeking to transact in precious metals for the first time.

So whether the project is to determine:

- Establishing a market footprint
- Accumulating or disposing of metal holdings
- Financing against inventory
- The ease of obtaining 9999 kilobars loco Hong Kong
- Determining the appropriate regulatory environment
- Designing investor products
- Education

Or indeed any other issues surrounding precious metals
Then G Cubed Metals will be able to handle the work.

All connected with G Cubed Metals are well aware of the need for confidentiality in all financial markets as well as the additional sensitivity that comes from transacting in precious metals. Particularly when it involves the "official sector" such as governments, central banks and sovereign wealth funds.

Although G Cubed Metals Ltd is based in England, Jonathan's experience is global and in the course of his 30 years in the markets he has visited over 60 countries to discuss precious metals including all of the largest 30 institutions declaring official gold holdings.
